

## ***New Jersey***

### **New Jersey General Comments**

- Transforming Reserve Component facilities is the key to enable Reserve forces to better meet current and future operational requirements. Ft Dix is an ideal location to support this transformation.
- Closing RC facilities is offset by the construction of modern AFRCs that will be the right size and design to support units that will be stationed there. Transforming RC facilities in New Jersey will improve training, readiness and quality of life for more than 495 RC soldiers, full-time unit support personnel, and their families.
- Each unit and activity transferred from Ft Monmouth has been placed to enhance its operational or support capability through consolidations or co-locations.
- Movement of all the Services' guns and ammunition work to Picatinny Arsenal will create a joint center of excellence and provide synergy in armament development for the near future and beyond, featuring a Joint Packaging, Handling, Shipping and Transportation (PHS&T) Center, particularly important in this current time of enormous demand for guns and ammunition by all the services.
- The result of these hard decisions is a basing configuration that better supports our transforming Army and saves money.

### **Reserve Component**

#### **Gains:**

- Build 1 Armed Forces Reserve Center
- Build 1 Equipment Concentration Site and Army National Guard Mobilization and Training Equipment Site
- Northeast RRC located at Ft Dix (see above)
